

Specialists in hard to find items and single source supply.

Environmental Protection

Power Roll-Up Doors and Safety Barrier Curtains

- Food handling, packaging & processing
- Welding, robotic cells and automation equipment
- Environmental containment and proprietary areas
- Pedestrian / fork truck throughways
- Climate sensitive areas and climate control

Key Features

- Available for high, medium and low duty cycles
- Stainless steel solutions for clean room requirements
- Screened mesh curtain doors with bug blocking capabilities
- Doors for high windload applications (up to 70 mph)

Wide range
of colours
and materials

Noise Abatement Solutions

- Noisy manufacturing plants
- Stamping and grinding areas
- High traffic areas
- Test areas that require very low noise levels

Key Features

- Site inspection and assessment of ambient sound pressure levels
- Variety of sound barriers, absorbers and composites
- Custom acoustical curtains, screens, jackets and covers
- Quilted sound absorbers, ceiling baffles and noise enclosures

Comply with
Noise
Regulations

Fabric Curtains, Partitions and Enclosures

- Welding, sanding and grinding areas
- Stamping areas and metal shops
- Machine mists, fumes and drafts
- Temperature and climate control
- Wash down areas

Key Features

- Available as stationary or with sliding track
- Very versatile, highly effective and economical
- Wide range of colours and materials
- All materials are fire retardant

Low cost
alternative
to rigid walls

PVC Strip Curtains

- Temperature and climate control
- Visual protection in welding areas
- Machine mist, fume and draft containment
- Alternative to doors in high traffic areas
- Food processing areas

Key Features

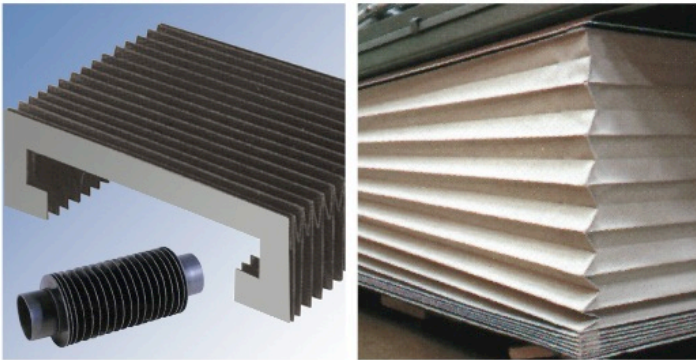

- Unique galvanized pre-studded mounting hardware
- Very versatile, highly effective and economical
- All materials are fire retardant

Stock products
available within
24-48 hours

Machine Protection

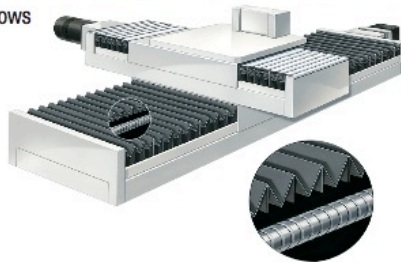

Fabric Bellows

- Thermally bonded or stitched bellows
- Lift table enclosures
- Stainless steel plated bellows
- Linear guide bellows

Key Features

- Clean smooth appearance
- High rigidity and strength
- High temperature resistance
- Liquid resistance

Way Covers, Wipers and Repair / Refurbishment

Way Covers

- Steel or stainless steel
- Various thicknesses
- Horizontal and vertical motion
- Cross rail and dual axis motion
- Repair most makes

Way Wipers

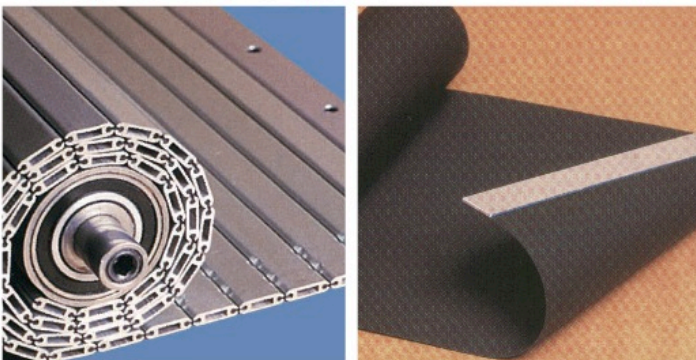

- High wear resistance
- Various hardness and damping
- Optimum resistance to oil, coolant and chemicals

HENNIG
 perfect machine protection.

Wide variety of configurations

Roll-Up Covers and Aprons

Roll-Up Covers

- Resistant to heat, coolants and heavy chip Loads
- Fabric, AGSI aluminum or walk-on
- Sealed links or stainless steel

Aprons

- Various types of fabrics
- Light and medium duty applications
- Weighted or fixed
- Standard or high-temperature

Chip Conveyors and Chip Disk Filtration Systems

Chip Conveyors

- Belt, scraper or magnetic styles
- Efficient, dependable chip collection
- Automated separation of chips and coolants
- No interruption of production

Chip Disk Filtration System

- Rotating disk, second stage system
- Filters chips and fine down to 40 microns
- Efficient fluid recovery
- Less frequent maintenance
